

JUSTINE JOHN B. NEBRES

Software Developer with professional experience building scalable web applications using Angular and Django. Proficient in designing clean software architectures, developing secure REST APIs, and creating modular, responsive frontends. Experienced in multi-tenant systems, workflow automation, and containerized deployments with Docker. Passionate about AI tools and automation workflows.

EDUCATION

Bachelor of Science in Computer Science

Bicol University College of Science, Legazpi City

Cum Laude, Dean's Lister (2020–2023)

Thesis Project:

Mobile Application for Classifying Sweetpotato Varieties Using ResNet50 CNN

- Developed an Android mobile application integrating ResNet50 deep learning model for image classification
- Trained and optimized CNN model in Python with focus on accuracy and computational efficiency
- Processed and prepared dataset for machine learning training and validation
- Integrated TensorFlow Lite model into Android application with custom UI framework

EXPERIENCE

Software Developer
February 2024 – Present

Synergia BPO Solutions Inc.

- Built and maintained multi-tenant systems with role-based access control using Django and Angular
- Developed responsive frontends using Tailwind CSS and Flowbite
- Implemented REST APIs for inquiries, tasks, legal, and finance workflows
- Integrated Pusher Beams for real-time push notifications
- Configured Docker containerization for application deployment
- Delivered complete solutions for multiple clients, from initial development to production

Viaje Super-App (Developer)
2025 – Ongoing

Daraga, Albay

- Contributing to a multi-service booking ecosystem (accommodations, ATV, tours, vehicles, guides, tickets)
- Collaborated on multi-tenant architecture implementation using django-tenants
- Assisted in building modules for bookings, schedules, pricing, and ticket validation
- Contributed to Progressive Web App (PWA) development for mobile accessibility
- Worked on modular Angular architecture with lazy loading and reusable UI components

AI & AUTOMATION PROJECTS

JustCode – AI Coding Task Board
2026

TypeScript, VS Code Extension API, Claude Agent SDK, Git, Kotlin (Android)

- Built a VS Code extension that runs a Claude Code agent on each task, each in its own git branch and worktree
- Added an automated review loop: the project's tests run after each step, then an AI reviewer checks the change before a one-click merge
- Built AI sprint planning, sprint branches that merge back when the sprint ends, and a token-protected phone server with an Android app
- Source: github.com/JustineQinLao/just-code-ai

MCP Server (Model Context Protocol)

*Python, FastMCP, Docker**

- Built a desktop document management tool for PDF merging, page numbering, and DOCX conversions
- Implemented drag-and-drop file handling with real-time preview
- Packaged as cross-platform desktop application using Electron

AI Chat Interface

Angular, N8N, Docker, NGINX

- Developed a web-based interface for interacting with AI models
- Integrated N8N workflow automation for backend AI processing
- Containerized deployment with Docker Compose

TECHNICAL SKILLS

Frontend Development:
Angular (Standalone Components, Signals, Angular Material), Flutter & Dart, Tailwind CSS, Flowbite, TypeScript, HTML/CSS, Responsive Design

Backend Development:
Django REST Framework, Python, Multi-Tenant Architecture (django-tenants), PostgreSQL, SQL

DevOps & Deployment:
Docker, Docker Compose, Basic AWS EC2, Basic NGINX Configuration, Cloudflare

AI & Machine Learning:
TensorFlow, TensorFlow Lite, ResNet50 CNN, Image Classification, N8N Workflow Automation, Model Context Protocol (MCP), Claude Agent SDK, AI Coding Agents, Whisper (Speech-to-Text), EmotiVoice (TTS), LLM Integration, Prompt Engineering

API & Integrations:
REST APIs, JWT Authentication, Pusher Beams (Real-Time Notifications), WebSockets, Tawk.to Live Chat

Programming Languages:
Python, JavaScript, TypeScript, Dart, SQL, Java, C#

Tools & Platforms:
Git, GitHub, VS Code, VS Code Extension API, Windsurf IDE, PocketBase, Electron, Capacitor, SAP Crystal Reports

CERTIFICATIONS & TRAINING

- Omada Certified Network Administrator (OCNA) Wireless
- TP-Link Network Associate — Enterprise Wireless

LANGUAGE

- English
- Filipino

PERSONAL PROJECTS

POS Coffee Shop 2026
Angular 19, Tailwind CSS, Electron, IndexedDB

- Building an offline-first point of sale system for small businesses
- Implemented mobile-first responsive design with Tailwind CSS
- Features include product management, sales tracking, and encrypted backups
- Designed for cross-platform deployment (Web, Android, Windows Desktop)

PDF & DOCX Manager 2026
Angular, Electron, Docker, TailwindCSS

- Built a desktop document management tool for PDF merging, page numbering, and DOCX conversions
- Implemented drag-and-drop file handling with real-time preview
- Packaged as cross-platform desktop application using Electron

QR-Based Tracking System 2025
Angular, Django REST Framework, PostgreSQL, Docker, Python

- Developed a registration and tracking system with QR code generation and scanning
- Implemented status workflow automation (pending, completed, rejected) with approval system
- Built custom user authentication with role-based access control
- Deployed to AWS EC2 with Docker and NGINX reverse proxy configuration

Wi-Fi Captive Portal with Feedback System 2025
Django, Django REST Framework, Tailwind CSS, PostgreSQL, Docker, Python

- Built a public Wi-Fi captive portal with user authentication and session management
- Implemented feedback collection system with ratings and user comments
- Integrated Tawk.to live chat for real-time customer support and troubleshooting
- Styled with Tailwind CSS for responsive and modern UI design
- Deployed to AWS EC2 with Docker containerization and NGINX configuration

Talas – Mobile eLearning App 2024
Flutter, Dart

- Developed an interactive eLearning application with gamification features
- Designed mobile-friendly UI for enhanced user engagement
